

1100 A,B,C & D Series Mechanical engine

Course Overview

A hands on, engine teardown course, designed to give an insight into the features and mechanical aspects of the engine. The course also covers service points and is therefore aimed at those within a technical role. Persons in non-technical roles are welcome to attend also.

Pre-requisite

Persons with a sound diesel engine background, wishing to attain knowledge of the 1100 Series mechanical range.

Course Objectives

The course aim is to provide a technical understanding of the 1100 Series mechanical engine range. At the end of the course the delegates will be able to –

- Use Perkins nomenclature to identify engine types
- Use information in Perkins workshop manual
- Strip and re-assemble 1100 Series engines
 - Carry out service operations
 - Course Outline
 - Reception and registration
 - 1100 Series history
 - Nomenclature
 - Technical presentation
 - Use of workshop manual
 - Strip and re-assembly
 - Service operations

Course Duration

1 Day

Course Location

Courses can be arranged to take place either at your premises, within a conference setting or at the Perkins Product Training Centres, in the UK
