

400C/D Series

Course Overview

A hands on, engine teardown course, designed to give an insight into the features and mechanical aspects of the engine. The course also covers service points and is therefore aimed at those within a technical role. Persons in non-technical roles are welcome to attend also.

Pre-requisite

Persons with a sound diesel engine background, wishing to attain or grow their knowledge of the 400C/D Series family.

Course Objectives

The course aim is to provide a technical understanding of the 400C/D Series range.

At the end of the course the delegates will be able to-

- Use Perkins nomenclature to identify engine types
- Use information in Perkins workshop manuals
- Strip and re-assemble 400C/D Series engines
 - Carry out service operations

Course Duration

1 Day

Course Location

Courses can be arranged to take place either at your premises, within a conference setting or at the Perkins Product Training Centres, in the UK
