

Perkins remanufactured engines are not just rebuilt, they are remanufactured to factory specifications

Remanufactured engines receive the following new genuine Perkins parts:

Sleeves, Pistons, Rings, Rod Bushings, Valve Guides, Valves, Valve Seals, Gaskets, Rod Bearings, Main Bearings, Accessory Drive Bearings, Lift Pumps, Thermostats, Fuel and Oil Filters, Oil Pumps, Injectors, Water Pumps, Turbochargers and Rockers.

Remanufactured engines receive the following remanufactured components:

Camshaft, Balancers, Lifters, Crankshaft and Injection Pump

Major castings and timing gears are magnafluxed and inspected for re-use. Blocks receive the updated flange liners when needed. Exhaust and intake seats are installed to maintain proper valve protrusion. Each engine is tested on a Dynamometer and checked for horsepower output and general engine operation. The cylinder head is re-torqued (*if required*) and valves re-adjusted. The engine is then painted, skidded and made ready for shipment and installation.

Perkins remanufactured engines are crack/weld free so you are guaranteed not to receive the last customer's failure. Your remanufactured Perkins engine will provide many years of faithful service and offers a cost effective solution to extend the service life of your original equipment.

CORE ACCEPTABILITY STANDARDS:

The following acceptability guidelines have been developed to insure the continuation of the Perkins remanufactures engine program. Adhering to these standards will make it possible to provide remanufactured engines at the quality level you have come to expect from your original Perkins engine.

Only like for like cores will be accepted for credit. Core credit will not be issued until the core is inspected prior to remanufacturing.

Inspection is guaranteed within 30 working days of receipt at our remanufacturing center.

1. Engine cores must be returned without prior disassembly.

Core must be returned with all the same components as supplied with the remanufactured engine.

2. Core must be properly skidded and drained of all fluids.

3. Missing parts or unserviceable major castings (*Block, Crank, Head*) will be charged back as per schedule listed on price sheet.

Missing or damaged components will be charged back at replacement cost.

WARRANTY INFORMATION:

Each exchange engine assembly is warranted to be free from defects in material and workmanship under normal use and services for one year. A full warranty statement is available upon request.
